PIECES OF CENTRAL

10 ARTIFACTS TELL STORIES ABOUT THE COLLEGE

12

WHY MAKE ART?

10

SAVING MOTHERS’ LIVES

20

“If I was at a big university, I don’t think I would ever get this opportunity.”

Kylie Gerstein, junior
I love a good story, which is why I like to spend time with Central College alumni. You are the best storytellers. The tales you tell about your experiences at the college are very personal and deeply meaningful. While you make reference to various places, programs, events and activities associated with the college, inevitably your stories are reflections about people.

I often tell prospective students that one thing our alumni have taught me about the uniqueness of the Central experience is that this is a place where you develop a strong sense of belonging. We sometimes refer to our campus as a place where we nurture a network of caring relationships. Students interested in Central are looking for an academic community where they can belong and thrive in all aspects of the educational and developmental journey. What they eventually realize is that the experience they seek is rooted in relationships that will endure.

The names are familiar to generations of Central alumni ... Huffman ... Brunsting ... Mills ... Schipper ... Butler ... Bosch ... Martin ... Hinga ... Graham ... Vruwink ... Willis ... and the list goes on and on. Before you read further, I would encourage you to write down the names of those who have had an enduring impact on your life and reflect on the reasons you have for listing them.

What you may realize is that some of the names you have listed are those you rarely encountered after graduation. Yet they have endured as voices in your mind when you faced opportunities and challenges along the way. Their influence may have surfaced in your continuing or professional journey as you reference an insight offered years ago. Conversations of the past echo in your thoughts as you remember how a word of caution or encouragement helped to shape your thinking. These people are the giants of relationship for Central College.

When we invite new faculty and staff colleagues to join the college community today, I can see a continuity that reaches back through time. The expectations when we hire are deeply rooted in the values and traditions of the past. For instance, the ideal that tells us we value teaching as the essential measure of faculty excellence. The commitment to student-athletes that reminds us we care about much more than wins and losses on the field of competition and see clearly the preparation for life our coaches emphasize. The engagement of students in co-curricular activities that guide personal and professional development and continues to be a high priority as we see the student as a whole person.

Today we stand on the shoulders of relational giants. Our calling is to become the giants for the next generation.

**Civitas** (USPS 096-840) is published by Central College, 812 University St., Pella, IA 50219-1999. Periodicals postage paid at Pella, Iowa, and additional offices.

Postmaster: send address changes (PS 3579) to Civitas, 812 University St., Pella, IA 50219-1999. Address changes also may be sent to alumni@central.edu.

Production notes:
Civitas is printed with a soybean-based ink by Town Crier, Pella, Iowa.

Civitas is published quarterly by the Central communications office for alumni, parents and friends of Central College. For information on the Civitas mission, visit civitas.central.edu.
Central hosted the Midwest Undergraduate Conference in the Humanities (MUCH) for the first time Nov. 12. Students from 10 colleges presented their research and creative work. Presentations explored areas including English, history, philosophy, religion, art, theater, Spanish, French, German, Russian and more.

Keynote speaker Aron Aji also presented. Aji is director of the Master of Fine Arts in Literary Translation program at the University of Iowa.

“It’s really a celebration of student scholarship,” said Kathy Korcheck, associate professor of Spanish. “It allows us to showcase the best of Central College student research and to help put our own students in contact with student researchers at other institutions.”
FLYING PANS CELEBRATE 10 YEARS OF HOMECOMING ALUMNI CONCERTS

Central’s Flying Pans steel drum band celebrated its 10th year performing with alumni members this year. The band, formed in 2000, has been joined by returning graduates for homecoming concerts every year since 2007. Each reunion features grads’ favorite tunes from their time in the band — including Central’s fight song finale.

The concerts are a great time for current students and alumni to connect, says director Stan Dahl. And most grads don’t have access to steel drums after leaving Central, so reunions are especially fun. “I am always encouraged that people want to come back and get together,” says Dahl. “It is great seeing students come home. That’s the best feeling. When they’re here, it is like they never left.”

The next alumni steel band concert will be during Homecoming 2017.

CENTRAL HOSTS MIDWEST SPORTS ANALYTICS MEETING

Central hosted students, researchers and ESPN The Magazine reporter Peter Keating for the Midwest Sports Analytics Meeting (MSAM) Nov. 19. The all-day conference featured sports analytics research presentations, networking and a keynote presentation by Keating.

Russ Goodman, associate professor of mathematics and assistant women’s soccer coach, coordinated the conference. Goodman also teaches Central’s senior seminar in sports analytics, and several Central students made poster presentations at the conference.

Goodman says sports analytics is an opportunity to showcase how math is used in the real world. “Importantly, this analysis process applies to many areas beyond the sports world,” he says.
Knocking off nine-time defending champion Wartburg on its home course, the Central women’s golf team rallied for its first Iowa Conference title since 1990.

It’s the program’s ninth championship overall and the first under league coach of the year Tim Wilkinson. Central trailed by 19 shots heading into the final weekend of the 72-hole tourney at Prairie Links Country Club in Waverly, but whittled the gap to one after the third round and finished with an eight-shot victory at 330-317-331-322—1,300.

The win earns the Dutch a first-ever berth in the NCAA Division III national tourney next May in Houston.

Junior Molly Timmerman, sophomore Brittany Coppess and freshman Emily Opsal received all-conference distinction. Timmerman was fourth with 84-75-84-81—324 in the tourney, which included 36 holes at Pheasant Ridge Golf Course in Cedar Falls. Coppess was fifth with 82-84-81-79—326 while Opsal carded 86-81-80-83—330 for ninth.

Central had placed second behind Wartburg the past three years and seven times in the previous nine. The Dutch later cracked the NCAA Division III Midwest Region rankings at No. 6.

Central rallied from 19 shots down to claim its first Iowa Conference women’s golf crown since 1990. (left to right): Emily Opsal, Brittany Coppess, Alison Kretzinger, Molly Timmerman, Lexie Patton, Cierra Pulse, coach Tim Wilkinson.

For the sixth straight year, the Central men’s cross country team was represented at the NCAA Division III championships as junior Mark Fairley earned a spot with a fourth-place Central Region meet finish.

Fairley was 61st at the national meet in Louisville, Ky., Nov. 19, finishing in 25:12.3 over 8,000 meters. It was his third NCAA appearance, placing 154th as a freshman and 98th last year.

Central was just five points out of first place at the Iowa Conference meet, but had to settle for fourth place in the hotly contested event. The Dutch were seventh in the 32-team regional meet.

Sophomore Rachel Peter’s 15th-place showing was Central’s best at the Iowa Conference women’s cross country meet. Junior Evie Kammeyer followed in 19th as the Dutch took fifth in the team standings. Central was 16th in the 32-team NCAA Division III Central Region meet in Northfield, Minn. The season was highlighted by the men’s and women’s squads’ trek to the Connecticut College Invitational, run on the shores of the Atlantic Ocean in Waterford, Conn., Oct. 15.

The Central football team rode one of the most productive offenses in school history to an 8-2 campaign.

Sam Markham was the Division III statistical champ with a school-record 104 pass receptions, good for 1,215 yards, also a school mark. Central’s 535.3 yards per game of total offense was a school mark as was its 30.1 first downs average.

Senior quarterback Riley Gray was a record-setter as well, completing a best-ever 64.2 percent of his throws (205-319-5) for 2,478 yards and 29 touchdowns. He also was Central’s second-leading rusher with 61.7 yards a game with a team-high nine scores.

A dramatic 50-49 overtime victory at nationally ranked Whitworth (Wash.) opened Central’s second eight-win season in the past three years. The Dutch had a league-high eight first-team all-conference picks after tying for second place. Gray, Markham, tight end Mitchell Boerm, right guard Cole Tanner, linebacker Jessie Peterson, defensive tackle Corbin Blythe, free safety Zach Matter and return specialist Zack Martinelli were cited. All are seniors. Defensive lineman Wes Wheat and linebackers Drew Carlson and Sam Norgaard were second-team picks.

Markham was named Central’s 36th football all-American by D3football.com, and the first Dutch wide receiver to receive the honor. Tanner, Martinelli and Matter were second-team D3football.com all-region selections.

Central senior tight end Mitchell Boerm was tabbed for the CoSIDA Academic All-America squad.

Boerm, a second-team selection, carries a 3.76 grade point average while majoring in biology. He was earlier named a first-team all-Iowa Conference choice with 25 catches for 383 yards and two touchdowns.

It’s the 53rd time that a Central athlete has received the honor and the 13th time a Dutch football player was selected. Boerm is the first football honoree since Ben Bollard in 2006.
Voices soar in the annual Christmas Candlelight Concert, which featured two performances on campus and one in Des Moines. A Central tradition, the concert included the sounds of A Cappella Choir, College Community Orchestra, Kerstbellen Handbell Choir and the Chamber Singers.
Get to know Mathew Kelly, associate professor of art

During more than 10 years teaching art at Central College, Mathew Kelly has helped countless students navigate the creative process. As a professional artist himself, Kelly knows that the first ideas usually aren’t the best. In his classes he says, “We always go through the process of starting with sketches. Take your judgment hat off—write down lists, take notes, do sketches, make little models if you want to. The key to having a great idea is having many ideas. You’ve got to be willing to experiment.”

Kelly, associate professor of art at Central, received a Bachelor of Fine Arts degree from University of New Hampshire and an MFA from Syracuse University. He came to the college in 2006 after stints teaching at Cayuga Community College, Syracuse University and Whitman College. As an artist, Kelly works in a wide variety of mediums but most prolifically in drawing, printmaking and book arts.

“THE KEY TO HAVING A GREAT IDEA IS HAVING MANY IDEAS.”

MY TOP FIVE PLACES TO EXPERIENCE ART ARE:

1. Des Moines Art Center
2. Frick Collection (New York)
3. Metropolitan Museum of Art (New York)
4. Isabella Stewart Gardner Museum (Boston)
5. Institute of Contemporary Art (Boston)

A Poisonous Thought. Ink, watercolor, graphite. 15” x 22”
See more of Mat’s work at www.mathewkelly.wordpress.com
Q: WHAT MOTIVATES YOU TO CREATE?
A: Making artwork is one of the ways I interact with the world. It is how I process ideas, deal with difficulties and explore new ways of thinking and working. It is how I shut out distractions and re-focus on what is important. Making art is how I maintain an intellectual curiosity. Life and all of its complexities motivate me to create because it is the best way I know how to make sense of it all.

Q: HOW LONG HAVE YOU WANTED TO TEACH ART?
A: When I was a junior undergraduate student I started thinking about teaching at the college level very seriously. I was one of the only students interested in printmaking at the University of New Hampshire so I started helping my peers learn the process and enjoyed that kind of work. From there I started to maintain the studio as if it were my own, which helped me land an assistantship in graduate school as the studio technician for the Printmaking Studios.

Q: WHAT DO YOU LIKE ABOUT DRAWING AND PRINTMAKING?
A: Drawing is a very direct and simple process that does not tie you down to special equipment, space or materials. It is versatile and something that can be done anywhere with either traditional materials such as graphite and ink, or alternative materials like leaves, chocolate syrup and gun powder, such as the work of artists Andy Goldsworthy, Vik Muños and Cai Guo-qiang.

Printmaking takes drawing several steps further. There are quite a few steps in the process of printing an etching, lithograph or relief print so one has opportunities at every step to either permanently or temporarily alter an image. It can be as simple as changing the color of the ink or as involved as multiple plates or blocks. Printmaking allows one to print multiples at each step so an idea can be fully explored.

Q: YOU TAUGHT IN MERIDA DURING SPRING 2016—WHAT STANDS OUT ABOUT THAT EXPERIENCE?
A: I could talk for days about my experiences in Mérida but one of the most valuable experiences I had was staying with a host family in Tinúm. I had stayed with Susie and Julian two years prior to teaching in Mérida during a faculty development workshop and requested to stay with them a second time. They treated my wife Anne and my daughter Madeline as their own family. We saw so many similarities in our values, concerns and wishes for the futures of our children. Our last evening together was a dinner with the extended family. They sent us on our way with a small bottle of honey they harvested from their own bees “so we would remember them each time we had some tea.” This simple gesture meant a lot to us.

Q: WHAT PROJECT ARE YOU MOST PASSIONATE ABOUT RIGHT NOW?
A: Right now, learning about the history of papermaking and books is very exciting. I have a series of small handmade books I am working on that are taking me in all kinds of directions, new and familiar. Additionally, I am revisiting some landscape ideas that I am equally excited about.

Mat Kelly shares more about teaching art in a video at civitas.central.edu.
10 OBJECTS WITH STORIES TO TELL

BY LAURA BILLINGSLEY ’04 AND JENNI HODGES

When you think of artifacts, what comes to mind? Is it Indiana Jones holding an ancient figurine? Or perhaps an Egyptian mummy’s tomb. Yet, artifacts are everywhere, and they help us remember the stories that are important to us. Here are 10 artifacts that tell stories of Central we never want to forget.

1 / CHOIR RECORD
This LP features 10 performances by Central’s A Cappella Choir and Chapel Choir in 1954 — including Handel’s Hallelujah Chorus and Hymn to Central Youth.

During Central’s early decades, professors and students gave music concerts nearly every week, and music degrees were some of the first offered. Central’s beloved A Cappella Choir was formed in 1932, and the college’s unique, all-brass marching band performed for illustrious audiences throughout the 1950s — including President Dwight D. Eisenhower.

Photos: Paul Gates
2 / OFFICIAL MACE
The Central mace (or staff) makes an appearance on stately occasions, such as commencement. Hand-crafted from cherry wood in the early 1980s, the mace is topped with a golden “C” surrounding a Bible and torch and the date of Central’s founding—1853—in the center. Bill Wesselink ’31 made the mace for the college. He was the son of former Central president John Wesselink, who served from 1925-34.

3 / COLLEGE PHOTO
The clothes may have changed, but the curious spirit of Central students remains the same! In 1930, some students adopted bowler hats for a dapper look, while others sported their Central beanies. Many female students wear the “finger wave” hairstyle popular with flappers.
It wasn’t just Central—beanies were a popular trend for first-year students at many colleges and universities starting in the 1920s. If caught without a beanie, the underclassman would be tasked with chores like carrying an older student’s books.

Central’s beanie use dates to pre-WWII and lasted until 1971, which was the last year new first-years wore beanies as part of “Freshmen Daze.” In a Central Ray story from fall 1972, the Freshmen Daze committee says: “…this year it would re-work Freshmen Daze to make it relevant and helpful instead of degrading and useless.” And so the beanie years came to a close on campus.
Central celebrated its sesquicentennial year from 2003-04 with fireworks, alumni residencies, a huge cake modeling campus, the first Homecoming parade in decades, Happy Birthday Dear Central Gala, a Valentine’s Day dinner for couples who met on campus, 150-year fashion show and more.

1860
In Central’s first graduating class, three students received degrees. The following year, nearly all male students enlisted in the Civil War.

1929-32
Central’s “Wonder Team,” including Richard “Babe” Tyseling ’32 and four other basketball starters, maintained a legendary 37-game winning streak.

1930s
During the Great Depression, students earned tuition through campus jobs in the Central College Student Industries factory, making toys, building furniture and cultivating tulip bulbs.

1941
The Sponsorship of Collegiate Private Flight Training program began training pilots at Central under supervision of the Civil Aeronautics Administration.
During the 1960s, Central’s enrollment tripled — from 430 in 1960 to 1,355 in 1969.

Central’s first group of students study abroad in Merida, Mexico.

Martin Luther King, Jr. speaks at Central. “Lubbers’ Lagoon” — the campus pond — is dug, despite local grumbling.

Women’s sports are launched at Central after the 1972 passage of Title IX.

Central wins its first NCAA Div. III national football championship.

1942
Central began its cottage housing system in 1942, buying several homes surrounding campus while Navy Air Cadets lived in Graham Hall.

1960s

1962

1967

1973

1974
It was a muddy day in Oregon in 2000. The football field in McMinnville at Linfield College was saturated with water and players were struggling to stay upright. Central trailed Linfield 17-14 in overtime, when a wild play resulted in the Dutch snatching victory from the Wildcats in a frenzy of flying mud on the final play, a botched kick.

After the win, Dutch players snagged the game ball—still covered in mud—and presented it to former defensive coordinator Don De Waard ’82, who keeps it as a memento of the Miracle in the Mud.

The ’70s were a big decade for the Dutch. Student population had tripled during the ’60s and Central College became home to more fans and athletes than ever before. Women’s athletics launched in 1973, and Central landed its first NCAA Div. III national football championship in 1974.
Urban legend sparked one of Central’s most beloved traditions — the Lemming Race, celebrated in imaginative style since 1977. A small group of second-floor Gaass Hall men concocted the offbeat concept, never dreaming it would evolve into a near-sacred Central tradition, and dry-witted Jack Grubaugh ’78 reigned as the first Grand Lemming. About 40 student lemmings staged separate men’s and women’s races to the pond in 1977. That number grew to 100 the following year. Central’s Theta Kappa Alpha fraternity later took over the event and students continue their endlessly creative getups for the race each year.

A part of the race tradition since the first year, Lemming Day T-shirts incorporate pop-culture references from movies and current events.
Wick, assistant professor of sociology, and Gerstein, junior sociology and Spanish major from Iowa Falls, are conducting original research on maternal mortality and its social influences. “We have the medical knowledge to prevent these deaths,” says Wick. “The clinical and technical causes are well known, but maternal death rates are uneven and vary widely between and within countries. Why?”

Several factors are thought to influence maternal mortality, including economic and gender inequality, healthcare infrastructure and access, and the efforts of non-governmental organizations. But which factors matter most? Wick and Gerstein plan to publish their research answering this question. “Sociology has a lot to offer, to help societies take on significant and complex issues,” says Wick. “Our primary focus in sociology is to explain and address real-world problems.”

The World Health Organization, World Bank, UNICEF and other international development organizations have drawn attention to alarming rates of maternal mortality, and reducing maternal deaths is part of the United Nations’ Sustainable Development Goals outlined in 2015.

“Maternal mortality has been on the radar for some time, and progress has been made,” Wick says, “but the global occurrence of maternal mortality remains alarmingly high and uneven across countries.”

Gerstein first investigated this topic in one of Wick’s sociology courses, where she analyzed causes of maternal mortality in Cambodia and developed a proposal to establish a non-governmental organization to address this problem. Last summer, she and Wick began the collaborative project, compiling data from
the World Health Organization, United Nations, Polity Project and other sources to conduct their analysis.

Wick and Gerstein have also worked to measure factors that affect maternal mortality factors by creating new variables covering more than 150 countries. For example, Gerstein created a new variable representing each country's capacity to train medical professionals, using previously neglected information from the World Directory of Medical Schools.

**NO EASY ANSWERS**

Several factors seem to influence maternal death rates directly, Wick says, but his and Gerstein's findings show many more complicated patterns. As an example, Wick points to complex relationships between public health spending and economic inequality. Healthcare spending may seem to significantly lower a nation's maternal mortality rates. However, Wick and Gerstein find the effect of higher government spending disappears when they account for the level of economic inequality in a country. This indicates a country cannot fix its maternal mortality problems by focusing on health spending alone.

“Our findings indicate that economic inequality among a nation's population undermines access to healthcare systems and significantly affects the likelihood of maternal death,” says Wick. “Improving health outcomes requires not only investment in national healthcare systems, but also investments in the social and economic well-being of individual citizens, families and communities.”

Most maternal deaths occur in developing countries, but Gerstein says many people are surprised to learn how relevant these findings are to the United States. Despite being one of the wealthiest nations in the world, America does not have one of the lowest rates of maternal mortality. The U.S. ranks 46th among the 184 nations with available data, and Gerstein says economic inequality must be a top consideration.

**WHAT DO YOU WANT TO STUDY?**

Wick and Gerstein discovered their shared interest in global health topics through sociology courses at Central and a 10-day study abroad trip to the Yucatan. Last spring, Gerstein returned for a semester in Merida, taking more healthcare classes and interning in a local hospital. By summer, she and Wick both received support for their collaboration through the Arthur J. Bosch Endowment for Student Research, Moore Family Foundation and academic affairs office. “If I was at a big university, I don't think I would ever get this opportunity unless I was really focused on the professor's interest,” said Gerstein. “Shawn asked me what I wanted to do – we're treating it like grad school. I got to pick my area of interest, and I am invested in the outcomes of the project.”

Wick says research grants give Central professors a chance to work one-on-one with exceptional students — and mentor them throughout the project. By completing this work, Wick says Gerstein will gain advantages beyond most of her peers: advanced research experience, confident presentation skills and an impressive final product.

“Central’s unique funding opportunities for faculty-student research are excellent,” says Wick. “We couldn’t do this work in a focused way without such support. This project is a really important example of what can happen when these resources are available.”

Based on her work so far, Gerstein received the top undergraduate research award at the 8th Annual Global Health Consortium Conference in Des Moines. This conference focuses on ways schools and community groups can improve sustainable global health through education.

“I know I want to be in women’s health,” says Gerstein. “Right now I’m trying to discern whether I want to be in practice or policy.”

Next, Gerstein plans to spend another semester abroad — this time in Granada, Spain. After finishing her degree at Central — complete with a minor in global health — Gerstein plans to complete a nursing degree from Central’s partner in Waterloo, Allen College.

Meanwhile, she’s enhancing her international vocabulary by studying “What to Expect When You're Expecting” in Spanish.
BUT THE ENDURING VALUE OF A CENTRAL COLLEGE EDUCATION STAYS THE SAME.

Your gift can make that education a reality for incoming students.

The Journey Scholarship Fund plays a vital role in offering financial assistance to students who would otherwise be unable to afford college. Every gift helps to support this goal.

Join with other Central alumni, parents and friends by making your gift today:

**’80s**

For information about Dean Chapman ’86, see the ’90s. For information about Cathy Snyders Gray ’88 and Dave Gray ’87, see the ’10s.

Raymond Beattie ’82 teaches social studies at San Diego Unified School District in San Diego, Calif., where he lives with wife Linda.

Dee Parker Marlett ’83 is an investment counselor at Principal Financial Group in West Des Moines. Dee and husband Tom live in West Des Moines; they are the parents of three children.

Michael Slaymaker ’83 of Maitland, Fla., is vice president of grants and planned giving for Easter Seals Florida. Michael was this year’s recipient of the Barbara Marion Award for Outstanding Leadership by the Association of Fundraising Professionals. Michael has been actively involved in many different facets of the association, from presenting and teaching to mentoring and outreach. In 2011, he was honored as the Outstanding Fundraising Professional for Central Florida.

Lyle Van Wyk ’84 is the sales manager at Pella Windows and Doors; he and wife Kay Vermeer Van Wyk ’85 are the parents of four children.

Scot Strojohann ’85 is senior vice president at GreatBanc Trust Co. in Des Moines. Scot and wife Marcia live in Elkhart.

Chris Hyland ’88 stepped onto a football field for the first time in 29 years, this time as a volunteer football coach at Assumption Junior High School in Walla Walla, Wash. Their season ended with a record of 5–1. Chris is executive director at the Walla Walla Watershed Management Partnership in Walla Walla, Wash., where he lives with wife Lisa.

Todd Hall ’89 and Dustin Calhoun of Lakeland, Fla., were married March 28. Todd is medical director at Lakeland Regional Health – Orthopaedic S.

Justin Kolenbrander ’89 has assumed the duties of legal attaché for the Federal Bureau of Investigation in Warsaw, Poland. As the legat, he serves as the FBI Director’s representative and senior FBI liaison officer in Poland responsible for all FBI investigative programs, maintaining

---

close bilateral working relationships with Polish law enforcement and governmental agencies. Justin and wife Angela are the parents of six children.

28 | CIVITAS
JOHN BOWLES

John Bowles, professor emeritus of biology, passed away Nov. 22 in Greensboro, N.C., where he lived with his wife Gay ’76 (Grace Chawner).

Bowles was born in Kariuzawa, Japan, on July 29, 1933. In 1936 the family moved to Honolulu, Hawaii. He graduated from Earlham College in Richmond, Ind., where he received a B.A. degree in biology in 1956. He and Gay were married in 1958 and moved to Seattle where Bowles completed a master’s degree in ornithology from the University of Washington. They moved to Honolulu where Bowles first taught high school biology at Punahou and later became the assistant director of the Waikiki Aquarium in Honolulu.

In 1963, Bowles took a job at William Penn College in Oskaloosa teaching biology. A Ph.D. in zoology from the University of Kansas preceded a career move to Central in 1969 where Bowles taught for 24 years before taking early retirement in 1993 as the result of being diagnosed with Parkinson’s disease. In 1993, Bowles and Gay moved to Austin, Texas, and later San Marcos, Texas, where he was involved with Bat Conservation International.

LILO RITTER

In 1960 she immigrated to the United States. She received a B.A. degree in German from Oakland University in 1967, a Master of Arts in German from Michigan State University in 1977 and a doctorate in German Language and Literature from Michigan State University in 1981.

Following her retirement in 1997, Ritter focused on researching and writing a book about her ancestors, the “Salzburg Germans.”

ELDON SCHULTE

Eldon Schulte ’58 passed away Nov. 17 in Pella. A member of Central’s Athletics Hall of Honor, Schulte, 80, lettered in football, basketball, baseball and track while also earning a B.A. in physical education. After graduating, he spent time in the U.S. Army and on his family’s dairy farm before coaching two years at Central. He then signed with the Chicago Bears and was a member of the taxi squad for the 1963 NFL champions.

Schulte returned to Central in 1969. He was head baseball coach for nine years, and was also a long-time football assistant, equipment manager and fields caretaker until retiring in 2005. Schulte and wife Mary have three children who each attended Central.

TELL US YOUR NEWS

Alumni are invited to submit Newsnotes online. We want to hear about recent promotions, degrees, honors, relocations, marriages and births to keep classmates and friends informed about important changes in your life. Update information online at civitas.central.edu or email alumni@central.edu. News items also are welcome by phone, 800-447-0287 or 641-628-5154. Or send a note to Central College Alumni Office, 812 University St., Campus Box 5200, Pella, IA 50219.
For information about Lucas Hamilton, see the ’10s.

Walker Adams of Osceola teaches fourth grade for the Clarke Community School District.

Angie Allgood of Oakville is the assistant to the lead pastor at the Bridge Church in Ottumwa.

Chris Askren of Polk City is a retail pharmacy technician at PRHC Pharmacy while attending graduate school at the University of Iowa.

Alli Balk of Pella teaches kindergarten for Pella Community Schools.

Jennie Voss of Ryan teaches in the West Delaware Community School District.

Jake Wassenaar is on the Fulbright Taiwan Foundation Scholarly Exchange.

Curtis Weeks is a group life and disability claim analyst at Principal Financial Group.

Nelson Wiese is working toward a master of science degree in mechanical engineering from Iowa State University.

BETTE BRUNSTING

Bette Brunsting, age 81, associate professor emerita of communication at Central College, died Jan. 6 at Hospice of Pella Comfort House. Brunsting, a 1956 Central graduate, served 34 years as dean and faculty member after returning to Central in 1964.

At Central, Brunsting was known for her rigorous public speaking classes, vivid personality and charge to students: “go forth and do great things.” According to Harry Smith ’73, former student and NBC correspondent, “Bette was ‘old school’ in the best possible way. She set high standards for her students. To not achieve those standards was unacceptable.”

Brunsting grew up on a farm in northwest Iowa with three sisters who also attended Central: Evelyn Kuyk ’47, Joyce Vander Well ’50 and Lucille Nordhoff ’48. Brunsting went on to spend nearly all her life in higher education. After graduating from Central, she became a high school speech teacher in Waverly. She continued to teach in Barrington, Ill., while completing a master’s degree from Northwestern University. Then Brunsting returned to Central for the rest of her memorable career.

“Central was her community and her life. It was the solar system that she orbited for most of her life,” said Brunsting’s nephew Steve Mathonnet-Vander Well, pastor of Second Reformed Church in Pella. “She was incredibly grateful always for what she considered the gift of a lifetime, getting to come back to Central.”

Besides her work with students, Brunsting served on the college advisory board, as well as the board of trustees as faculty representative. She received the David Crichton Memorial Award in 1997 and the Alumni Stewardship and Service Award in 1998. In 2001, she was presented the Iowa Communication Association Citation Award, the organization’s highest award.

Upon her retirement, associate professor of communication studies Dennis Doyle told Central’s student newspaper, “One doesn’t ‘replace’ Bette Brunsting — one simply tries to get along without her. I regard Miss B as a master teacher and a Central College legend.”

Brunsting is honored on campus with Central’s Brunsting Fireside Lounge in Graham Conference Center. In addition, the Bette Brunsting Student Project Fund provides for student-faculty collaborative research projects, cultural travel and professional meetings.

Brunsting is survived by one sister, Lucille, as well as 13 nieces and nephews.

“GO FORTH AND DO GREAT THINGS.”
Larry Mills, age 93, professor emeritus of art at Central College, passed away Jan. 5 in Des Moines. Mills was a faculty member at Central for more than 40 years after joining the college in 1950. Following his retirement in 1993, Mills continued to serve in various roles on campus.

Hired as an instructor for a one-year appointment in 1950, Mills quickly became part of campus life. His artistic talent and quick wit were well known, and throughout the years he contributed many original artworks to the college and surrounding community. He was instrumental in establishing the college's study abroad program in the Mexican state, the Yucatan, and his contributions to Central's art department were recognized in 1975 with the creation of the Mills Gallery, named in his honor.

Mills was born in Marshalltown in 1923. He received a B.A. degree from Drake University in 1947, a Master of Fine Arts from University of Georgia in 1950 and completed further graduate work at Columbia University in 1958-59. He earned a Ph.D. from the University of Iowa in 1963.

Mills progressed quickly at Central, becoming an assistant professor in 1953, associate professor in 1958 and professor in 1964. During his tenure at the college he presented numerous shows of his own work both on campus and off. Mills's extensive body of artistic work included drawing, painting and sculpture.

In 1955 he visited the Yucatan to explore the possibility of a summer student program. This trip led to the creation of Central's study abroad program in the Yucatan. In addition to serving on many college committees during his employment, Mills served as chair of the art department, taught courses abroad and assisted with summer Upward Bound programs at Central. He was an active community volunteer, serving with various organizations in Pella.

Those who knew him remember Mills's deep curiosity and unremitting kindness. Joline De Jong '55, Central College assistant professor emerita of art, took classes with Mills as a student and then worked with him in the art department until his retirement. "His classes were fascinating," she says. "As a student, I noticed his interests were so broad, he always had stories to tell about different topics, to get us thinking."

Mills and wife Evangeline Lubbers had three children, Lisa LaValle '74, Marc '74 and Thad '77. Evangeline passed away in 1961.

Mills is remembered on campus with the Mills Gallery in the Lubbers Center for Visual Arts, which plays host to student, faculty and visiting artists' works. In 1997, the ceramic sculpture "Kan Kal" by Des Moines artist David Dahlquist was installed at the front entrance of the gallery to honor Mills's years of service.
When Jim Brandl and Sue Spaans Brandl met as students at Central in the 1960s, little did they know the kind of lasting impact the college would have on them or their shared future. “We knew we had great experiences at Central—dedicated faculty and staff, challenging classes and the development of lifelong friendships, but we didn’t fully understand the scope of those experiences until we entered the work place and began our own family.”

Jim was on Central’s faculty for several years before eventually founding his own highly-successful IT company. Sue is an emeritus member of Central’s Board of Trustees, where she served as secretary, and is a volunteer in the Pella community and her church. One of their daughters, Jennifer, is a 1992 alumna of Central. Recently Jim and Sue informed the college that it will receive a gift through a bequest in their will.

“Central had a significant impact on our lives, and sharing a portion of our estate to support the college’s future work really leaves us with a good feeling of being able to share our blessings in this way. We want and need Central to stay strong. We want to help ensure that Central continues to provide the kind of educational experience we enjoyed for generations to come. We hope others will join us in this endeavor to support students.”

To learn more about making a charitable gift to Central through a will bequest or other types of planned gifts go to http://plannedgiving.central.edu or contact Don Morrison in the Advancement Office at (641) 628-5280 or morrisond@central.edu.
Phil VanderWilt ’63

may be among Central’s most globally traveled alumni but he’d rather talk about his Iowa roots, values learned at Central and the need for more care and compassion in today’s world.

He casually mentions having visited 125 countries, flying in and out of an estimated 80 percent of the world’s largest cities, yet talks animatedly about a driving trip on Election Day to the Pacific Coast from his long-time home in Vacaville, Calif.

The career pilot has met many heads of state and dignitaries throughout the world including the King of Spain and members of Jordan’s royal family, yet quickly diverts the conversation to Central legends who left an impression on him or fellow alumni who, in his view, have accomplished much more.

An economics and business graduate, VanderWilt describes his time at Central as non-traditional in that while a student he was already married to his Lynnville-Sully High School sweetheart, Carol. He entered the U.S. Air Force four years after graduation, training as a pilot and serving deployments for the next 20 years.

After his military retirement, VanderWilt flew domestic and international flights for American Airlines until the Federal Aviation Administration’s mandatory retirement age of 60. He then worked as flight manager for Intel Corporation, the company behind most of today’s computer chip power.

Through connections at Intel, VanderWilt became known to Ken Behring, the founder of the Wheelchair Foundation, as well as a successful real estate developer and former owner of the Seattle Seahawks football team. VanderWilt was hired as chief pilot to plan and fly the foundation’s missions to deliver wheelchairs to the disadvantaged throughout the world for the next 15 years.

“As chief pilot, I had a unique position among foundation representatives and was very involved in planning trips to more than 125 countries,” VanderWilt says. He and wife Carol—who was first a foundation volunteer and then employee—flew throughout Europe, Africa and China, often returning multiple times to familiar locations.

“I remember being in a Jordanian village helping disabled kids with wheelchairs when I saw a father with little kids. I asked if I could give them candy. He was skeptical at first of course but later invited me into his home for tea,” VanderWilt recalls. “That stood out for me because he had never met an American.”

During the VanderWilts’ 15-year association with the Wheelchair Foundation, the non-profit distributed more than one million free wheelchairs, and although the foundation is less active now, VanderWilt still answers the occasional call to fly a mission.

“We did a lot of good in the past,” he recalls, “It was very rewarding to help poor people, in jungles and in a variety of conditions, all over the world.”

VanderWilt relied heavily on management skills throughout his long aviation career, skills he says he learned at Central from the late professor of economics Don Butler, Hall of Honor athlete and coach Eldon Schulte ’58, and of course, the legendary coach Ron Schipper.

“Football was my sport,” says the 1962 winner of the Richard Mentink Award for Leadership and Sportsmanship. With tongue in cheek, he also says, “Coach Schipper came to Central when we were juniors. We trained him to be successful and were instrumental in his development.”

Today, VanderWilt loves to fly fish, play tennis and participate in church activities in Vacaville, located midway between Sacramento and San Francisco, where he first entered the Air Force and went wheels up in the late ’60s.
Erica Swanson ’99 recognizes her privilege as a Googler, working and living in Silicon Valley with husband Brian Smith ’99 and their two children. She also knows it’s a rare privilege to not only live and work your passion and values but to literally see your work in action across the country.

As head of community impact programs for Google Fiber, Swanson leads a cross-functional team of Googlers who build, launch and drive programs to reach non-Internet users, primarily in large metropolitan areas.

"Google Fiber is our response to digital inclusion, a move toward digital equity. It’s very data-driven (who uses, for what, what works, what doesn’t). It’s all deeply correlated with income and color so we look at ‘why?’ Most often, affordability is the core issue," Swanson says.

Google Fiber launched as a pilot in Kansas City in 2012 "to see what innovations could be unleashed in an economic development project," Swanson says. “I was intrigued by the local, physical work, and with putting a face on Google in those neighborhoods, to inspire and innovate with intention.” Google Fiber services have since expanded to Atlanta, Austin, Charlotte, Raleigh-Durham, Nashville, Provo, Salt Lake City and San Antonio.

“Our most sustainable work is done in coalitions, across sectors, with elected officials, other providers, homeowner groups and community leaders,” Swanson says. “The work takes many forms, from literally digging up yards in public housing projects to install fiber networks, to thought leadership and in-kind financial support.”

Swanson was recruited by Google in 2011 as outreach and partnerships manager for public policy in Washington, D.C., where she earned a master’s degree in public policy and women’s studies from George Washington University. While deputy director of field operations for The Leadership Conference on Civil and Human Rights, also in D.C., Swanson developed public education and strategies to advance such issues as economic security, transportation equity, education reform and voting rights. In her first digitally-focused project, she led a $3-million campaign to help the hardest-to-reach make the transition from analog to HDTV.

“My career pattern has been in deep public policy and community engagement and investment. I work with those who know the area and can assess the needs for technology as a positive force for good,” says Swanson. “At Google Fiber, my double major in political science and sociology makes perfect sense. I came to Central expecting to major in communication, having edited publications in high school, but my parents—a lawyer and a teacher—encouraged me to be open-minded.”

Swanson found herself pushed at Central to consider how issues impacted real people. “So many people at Central helped me to think about the world in healthy ways, to question ‘why do I believe what I believe?’ For example, an honors class with Don Maxam on ‘The Social Movement of the ’60s.’ He was an activist himself and asked us ‘what would you do to effect change?’ In a Social Problems class, sociology professor Jon Witt framed up issues of inequality and injustice that made me think ‘I can devour this.’ I was intrigued. The light bulb went on.”

Swanson turned her passion for these topics into a career. She says, “I’ve made a profession out of social issues and change. It’s rewarding when I get to be there and talk with residents and see, hear and feel the work and how it helps people.”

To students interested in social change, she says, “Know what you are most interested in and why and apply your skills to that cause, because that’s what you will be best at. The liberal arts foundation is really key. That’s who I hire because a liberal arts education makes you think critically about how to tackle issues.”

“In Silicon Valley, it’s the big ideas and optimism that get the attention. My job is to close that gap between the big ideas and the users’ reality. We Googlers are motivated by problem-solving, so I’m always pushing myself to do new things.” And to do good.
